

The Safe Scrubbing Alternative.[®]

- Safer for your employees
- Safer to use
- Safer for the environment
- A safer purchasing choice

The Safe Scrubbing Alternative[®]

The safer way to clean.

Using up to 70% less water, floors scrubbed with FaST™ are immediately clean, dry and safe for traffic.

FaST does not require measuring or mixing, cleans up to 1,000,000 square feet with 90% less detergent than conventional scrubbers, and cuts your time spent cleaning up to 30%.

It's the smartest, safest way to scrub your floors.

SAFER FOR YOUR EMPLOYEES

Uses up to 70% less water.

Drastically reduces dry-time.

Works on all floor finishes.

Now you can maintain a cleaner facility while protecting your most valuable assets— your employees. FaST uses up to 70 percent less water than conventional scrubbers, so floors dry faster—reducing the risk of costly slip and fall injuries. And it's safe for use on all floors and floor finishes. You'll find it's the perfect solution to create a cleaner, safer work environment.

SAFER TO USE

Does not require measuring or mixing.

pH neutral cleaner.

Easy to store.

Your operators never have to touch chemicals again. They simply install the FaST-PAK™ cartridge, add water, push a button and go. FaST does all the work—automatically delivering the correct mixture the first time and every time—ensuring a consistent, effective cleaning process from the top of the building to the bottom, from the first shift hour to the last.

“When I saw the FaST system for the first time, the increased safety was undeniable and the number one selling point for us.”

**—Duane Oliver, LEAD TECHNICIAN/MANAGER,
IHM FACILITY SERVICES FOR DELPHI AUTOMOTIVE**

SAFETY FIRSTS

Seat Belts.

Volvo develops the first safety belt in 1849. In 1958, Nils Bohlin, a Swedish inventor, invents the three-point seat belt, a standard safety feature in most cars today. Volvo introduces the three-point belt as a standard feature in 1959.

Smoke Detectors.

The single-station, battery-powered residential smoke alarm was first developed in the 1960s and became available to consumers in the 1970s. Today, 94% of U.S. homes have at least one smoke alarm.

FaST.

In 2002, Tennant develops a simpler, safer method to clean floors—a detergent delivery system that uses injected air and water to create foam for scrubbing. Foam scrubbing uses less water than conventional scrubbing systems, so floors dry faster and are safer to walk on sooner.

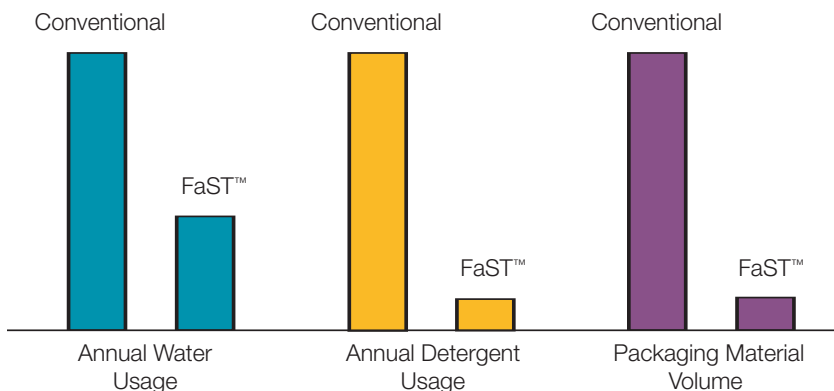

SAFER FOR THE ENVIRONMENT

Conserves water.

Biodegradable.

Reduces wastewater and chemical use.

It's clear. FaST significantly lowers the impact floor cleaning has on the environment—helping create a cleaner, safer world. And since FaST is packaged in a convenient two-liter container, it also cuts down on the amount of packaging material when compared to conventional plastic containers—up to 90 percent. Could there be any more earth friendly scrubbing system on the market today?

A SAFER PURCHASING CHOICE

Puts Tennant innovation to work for you.

Works on proven automatic scrubbers.

Features legendary Tennant reliability and quality.

FaST brings innovation to your cleaning process – improving safety for your employees and operators while delivering excellent cleaning results. What's more, the technology has been applied to automatic scrubbers that have been tested in the real world and have since become the industry standard. Tennant quality plus FaST innovation. It's a winning combination and a safe purchasing choice for your cleaning program.

FaST-PAK™ CLEANING CONCENTRATE

Easy-to-handle FaST-PAK cartridges are safe to use on a variety of floors, effectively cleaning light-to-heavy soils and grease.

Available in FaST 365 concentrate or 665 heavy duty cleaner/degreaser.

Tested Safe for Floor Finishes

The nationally-recognized independent testing laboratory, ASPEN, determined that FaST:

- Performs as well as or better than conventional scrubbing;
- Effects on finish gloss are the same as conventional scrubbing.

For a copy of test results, please call toll-free 800.553.8033.

FaST is the first and only automatic cleaning system certified by the NFSI to dramatically improve overall floor traction by up to 21%.

SEEING IS BELIEVING

See for yourself how FaST can help you reach a higher standard of cleanliness and safety in your facility. For a demonstration or additional information, call 800.553.8033.
